service to agriculture

What is nutri-bio?

nutri-bio is the final treated product of sewage treatment otherwise known as biosolids. It offers enormous potential to make savings on agronomic inputs, providing valuable quantities of organic material, nitrogen, phosphate, sulphur & magnesium, with excellent soil conditioning properties. nutri-bio presents a value for money service, including delivery and application, with year round availability.

Farmer benefits

Value adding product- cost effective source of nutrients: phosphate, nitrogen, sulphur and magnesium.

- organic matter- soil conditioning properties
- wide range of trace elements
- all inclusive spreading service
- professional advice - all Anglian Water FARM SALES ADVISORS are FACTS qualified. We have eight farm sales advisors each covering a different area throughout the Anglian Water region

Range of products

There are a number of products available across the Anglian Water region covering the counties Norfolk, Suffolk, Essex, Cambridgeshire, Lincolnshire, Buckinghamshire, Bedfordshire and Northamptonshire. The product type is dependent on your location, as different treatment centres provide different products.

Products include:

- nutri-bio conventionally treated cake
- nutri-bio calci-cake
- nutri-bio granules
- nutri-bio compost
- nutri-bio co-compost

Pricing

A small charge is made for the nutri-bio service, which will vary depending on the type of product and your location. All prices are inclusive of soil sampling, nutrient management planning, delivery and application. The service is available from your Farm Sales Advisor.

If you would like further details or would like to arrange a visit from your local farm sales advisor, please do not hesitate to contact us on:
